INDEPENDENT PORTFOLIO · SYNTHETIC DEMOS

# Boyi Automation.

AI-assisted automation for messy data, documents, and meeting notes. Fixed scope, tested outputs, source included.

| 3 | 1,206 | 48 | 4:21 |
| --- | --- | --- | --- |
| PROOF PROJECTS | ROWS CLEANED | PDFS PROCESSED | AUDIO TRANSCRIBED |

Independent demos. Synthetic data and audio only. No client names, logos, testimonials, or revenue claims.

01 · THE WORK

# Three input types. One pattern.

## Excel → weekly report

Clean, validate, deduplicate, and package a repeatable workbook.

## PDF invoices → Excel

Header fields, line items, math checks, exception log.

## Meeting audio → notes/SRT

Summary, actions, decisions, risks, bilingual subtitles.

Controlled benchmarks on synthetic demo data. See each case for assumptions and limits.

02 · SERVICES

# Small, fixed-scope builds.

| SERVICE | FIVERR FROM | CONTRA FROM | OUTPUT |
|---|---|---|---|
| **Spreadsheet cleanup & reporting** | $45 | $120 | Workbook, dashboard, exception log, script |
| **PDF invoice → Excel/CSV** | $65 | $150 | Invoice/line-item tables, math checks, exception log |
| **Meeting notes & action items** | $45 | $95 | Summary, decisions, risks, actions, SRT |

## How I work

1

### Sample first

One representative file or recording before a quote.

2

### Fixed scope

Deliverables, assumptions, revisions, exclusions.

3

### Human QA

Automation does the heavy lifting; I review the output.

4

### Audit trail

Working files, source, exception/test report.

03 · PROFILE

# Boyi Automation

I build small automations that turn messy business inputs into clean, usable outputs. My current focus is spreadsheet reporting, PDF data extraction, and meeting-to-action workflows.

I use AI-assisted tooling to build quickly, then personally review and test every deliverable against real sample data. You get the working files, source code, and an audit trail — not a black box.

**3**

working case studies

Excel, PDF invoices, and meeting audio.

**20**

automated tests total

6 + 8 + 6 across the demos.

**Source**

included

Repeatable scripts and README files.

No off-platform payment or contact. Use the platform where we connected. Independent demos. Synthetic data and audio only.
