INDEPENDENT DEMO · SYNTHETIC AUDIO

Meeting audio.
Notes, actions, and SRT.

A transcript-first workflow that transcribes a meeting, applies human correction, extracts decisions and action items with owners and due dates, and packages English, Chinese, and bilingual subtitles.

3	4:21	13	25
MEETINGS	AUDIO DURATION	ACTION ITEMS	CAPTIONS

Built with Python 3.15 + Vosk + openpyxl · 6/6 automated tests passed · human-corrected transcript

01 · PROBLEM

Raw ASR is useful, but not ready to send.

The small offline ASR model makes mistakes with names, numbers, and similar-sounding words. The final notes use a human-corrected transcript, so owners and deadlines are not guessed from garbled text.

Raw ASR snippet: weekly products sink october twelfth twenty twenty six saver good morning let's review the launch plan key point the beta launch is still on track for october thirtieth but the payment integration is blocked by the vendor noah i checked the pricing sheet yesterday the annual plan is missing to regional prices action item know i will update the pricing she'd by wednesday mia i spoke with three beta customers they want

Meeting	Duration	WER	Actions
Weekly Product Sync	102.6s	20.2%	5
Client Onboarding Call	78.8s	20.7%	4
Operations Review	80.5s	17.6%	4

02 · BUILD

A transcript-first workflow with a visible correction step.

ASR 1

Vosk transcribes the WAV and returns word timings.

Correct 2

A human-reviewed transcript fixes names and numbers.

Extract 3

Rules find key points, decisions, risks, and action items.

Package 4

Notes, CSV, Excel, and three SRT variants.

Owner	Task	Due
Noah	update the pricing sheet	2026-10-14
Liam	send the revised launch deck	2026-10-16
