INDEPENDENT PORTFOLIO · SYNTHETIC DEMOS

Boyi Automation.

AI-assisted automation for messy data, documents, and meeting notes. Fixed scope, tested outputs, source included.

4	1,206	20	30/30
PROOF PROJECTS	ROWS CLEANED	FILES AUDITED	TESTS PASSED

Independent demos. Synthetic data and audio only. No client names, logos, testimonials, or revenue claims.

01 · THE WORK

Four input types. One pattern.

Excel → weekly report

Clean, validate, deduplicate, and package a repeatable workbook.

PDF invoices → Excel

Header fields, line items, math checks, exception log.

Meeting audio → notes/SRT

Summary, actions, decisions, risks, bilingual subtitles.

File inbox → clean folder

Scan, deduplicate, validate, normalize, and plan safe copies.

Controlled benchmarks on synthetic demo data. See each case for assumptions and limits.

02 · SERVICES

Small, fixed-scope builds.

SERVICE	FIVERR FROM	CONTRA FROM	OUTPUT
Spreadsheet cleanup & reporting	$45	$120	Workbook, dashboard, exception log, script
PDF invoice → Excel/CSV	$65	$150	Invoice/line-item tables, math checks, exception log
Meeting notes & action items	$65	$150	Reviewed notes, actions, SRT (not certified)
Python file & folder automation	$75	$250	Manifest, exceptions, safe copy plan, normalized names, script

How I work

1

Sample first

One representative file or recording before a quote.

2

Fixed scope

Deliverables, assumptions, revisions, exclusions.

3

Human QA

Automation does the heavy lifting; I review the output.

4

Audit trail

Working files, source, exception/test report.

03 · PROFILE

Boyi Automation

I build small automations that turn messy business inputs into clean, usable outputs. My current focus is spreadsheet reporting, PDF data extraction, meeting-to-action workflows, and file-folder automation.

I use AI-assisted tooling to build quickly, then personally review and test every deliverable against real sample data. You get the working files, source code, and an audit trail — not a black box.

4

working case studies

Excel, PDF invoices, meeting audio, and file folders.

30

automated tests total

6 + 8 + 6 + 10 across the demos.

Source

included

Repeatable scripts and README files.

No off-platform payment or contact. Use the platform where we connected. Independent demos. Synthetic data and audio only.
